Marking Criteria

COMP9444 Group Project

Total Marks: 28+3

- Project Notebook **15 marks**
- Summary Report (max 4 pages, excl. references) **5 marks**
- Project Presentation **8 marks**
- Group Class Participation **3 marks**

1. Project Notebook

Component breakdown

Criterion	Marks
Introduction, Motivation and/or Problem Statement	1
Data Sources or RL Tasks	1
Exploratory Analysis of Data or RL Tasks	3
Models and/or Methods	3
Results	3
Discussion	2
Writing	2
Total	**15**

Introduction, Motivation and/or Problem Statement **1 mark**

> Clearly define the problem statement or purpose of the project.

Data Sources or RL Tasks **1 mark**

> Data sources or reinforcement learning tasks are clearly documented and described.

Exploratory Analysis of Data or RL Tasks **3 marks**

> Provide details about the properties, number of classes, pre-processing, and challenging aspects of the data (or the RL task).

Models and/or Methods **3 marks**

> Model(s) and/or method(s) are judiciously chosen and appropriately applied. If building on previous work, identify the source and clearly delineate which parts are your own work.

Results **3 marks**

> Results are clearly shown, discussed, and evaluated using appropriate metrics. Good use of graphs or other visualisations where possible. Comparison with previous methods / state-of-the-art where appropriate.

Discussion **2 marks**

> Discuss the results and analysis, provide insight about system performance, including strengths, weaknesses, limitations, and possible future work.

Writing **2 marks**

> Notebook is presented in a readable format. Appropriate section/subsection headings are provided in markdown format. Codebase is easy to follow.

Important: Do NOT submit multiple notebooks. Aggregate all your work into a single notebook.

2. Project Summary Report

Component breakdown

Criterion	Marks
Introduction	0.5
Literature Review	0.5
Models and/or Methods	0.5
Experimental Setup	0.5
Results	0.5
Conclusions	0.5
Details in the report	1
Overall quality of the report	1
Total	**5**

Introduction **0.5 marks**

> Provide a high-level description of the project.

Literature Review **0.5 marks**

> Review existing methods/techniques relevant to the project.

Models and/or Methods **0.5 marks**

> Justify and explain the selection of models and/or methods appropriate to the task.

Experimental Setup **0.5 marks**

Provide clear details about model parameters, evaluation metrics, and data split into training, validation, and testing sets.

Results **0.5 marks**

Discuss the main findings and results. How well does the system perform? Compare to other methods/SOTA if possible.

Conclusions **0.5 marks**

What are the key strengths and weaknesses of the proposed solution? What are the key limitations? Recommendations for future work.

Details in the Report **1 mark**

Report provides sufficient details to understand the project clearly: motivation, dataset, rationale for model selection, results, and conclusions.

Overall Quality of the Report **1 mark**

Summary report is well-presented and formatted, within the specified length, without grammatical mistakes or typos.

3. Project Presentation

Component breakdown

Criterion	Marks
Individual-based	
Contribution to the presentation	1.5
Clearly spoken and understandable	1.5
Group-based	
Clear problem statement	1
Clear presentation of data / data exploration or RL task	1
Clear presentation of models and/or methods	1
Clear presentation of results, result analysis, or error analysis	1
Quality of slides or visual presentation material	1
Total	**8**

Individual-based criteria (3 marks total per student)

Each student is assessed individually on their visible contribution to the presentation and on the clarity of their communication during their speaking component.

Group-based criteria (5 marks shared)

The remaining marks are awarded to the group as a whole based on the quality and clarity of the overall presentation content and visual materials.

4. Project Session Participation

Component breakdown

Criterion	Marks
Individual-based	
Group project sessions participation	3
Total	**3**

Project Session Participation **3 marks**

> Participation in group monitoring sessions (week 7–week 9) will be taken into account. There will be three monitoring sessions in total, contributing up to 3 marks individually.
